THE NEW AGE FOUNDATION

The BSRA Hdqrs. is in receipt of a 5-page bulletin issued by the New Age Foundation, 4202 Manhattan Ave., Sea Gate, Brooklyn 24, N.Y., explaining the purposes of the organization and inviting cooperation and membership. The Director is Dr. W.S., known to many of our readers as the compiler of the ms. of the Last Days booklet, released thru the BSRA Hdqrs. *

This New Age bulletin contains communications from a "higher Being" named Urania. According to these, the New Age will dawn in 1953, and will find its home in Central and South America - while the present civilization will destroy itself by atomic suicide. World War III will break out unexpectedly and will center in Germany. California, New York, and the North Atlantic seaboard are the most dangerous areas; Florida and Texas will be comparitively safe. There will be tidal waves in the East and earthquakes in the West. The Flying Saucers will not land until present civilization has been destroyed (1953). The destruction should be over by 1954. New York will be the first city destroyed.

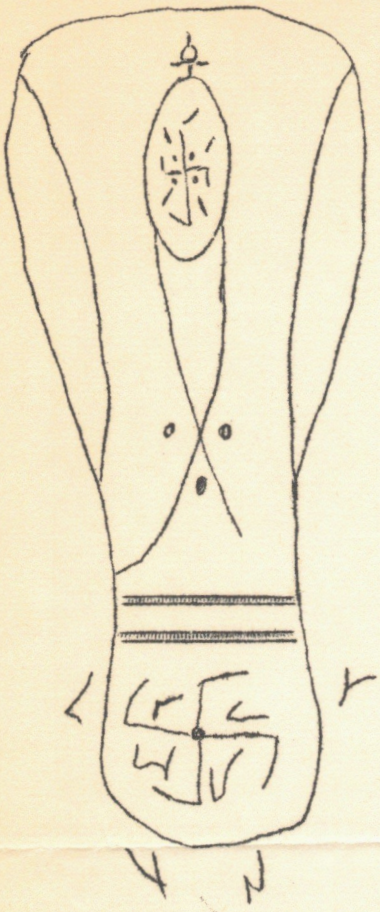
The Communicator Urania goes on to urge immediate action on the part of all who can understand the imminence of this danger, and who wish not only to preserve their own lives but to be of service to their fellows during the dark days to come. And afterlong study of many countries (says the N.A.F. Director) "we have selected the mountains of the Chiriqui Province of Panama as offering the best opportunities for our purpose. Several hundred Americans have settled there. We shall establish temporary headquarters in Boquoto ... a health center near the borders of Costa Rica, in one of the most healthful climates in the world ... reached by a railway from David, capital of the Chiriqui Province of Panama." The bulletin carries an enrollment blank and specifies a minimum enrollment fee.

The BSR Director, as most Associates know, also believes that catastrophic events are likely in the near future, tho unable to make specific forecasts. The foregoing paragraphs are printed as a matter of public information and of interest to many readers. We cannot supply detailed information or give personal advice to anyone. We do recommend, of course, that readers who are interested in the New Age Foundation and a possible settlement in Panama, write at once to the N.A.F. Director at the address given in the first paragraph above (enclosing postage for reply).

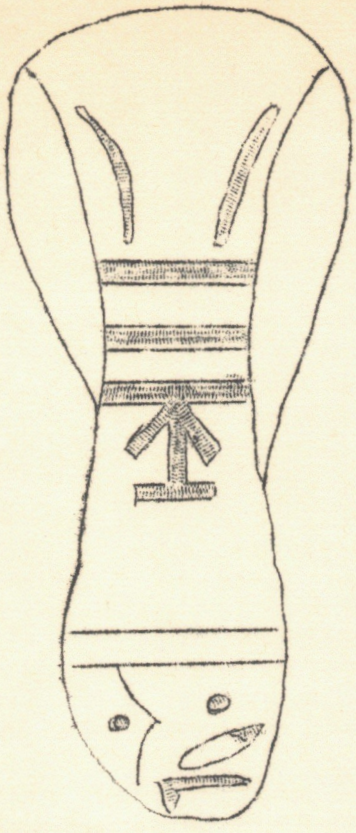
---

* At the time this booklet (30 pgs) was issued by us, its author proposed a settlement in Guatemala - which proved impracticable. The booklet nevertheless contains important and interesting material, much of which agrees with other sources and is worthy of attention. A few copies of this (Last Days) remain on hand at original price ($2.00).

(ML)



"A" - Right foot



"B"- Left foot.

DRAWINGS MADE FROM PLASTER CASTS OF FOOTPRINTS OF "DISC MAN". ⌊ left.

STORY OF THE INCIDENT, FROM PHOENIX GAZETTE OF NOV. 24, 1952.

Principals: Dr. George Williamson, 25. Prescott; Mrs Williamson, medical technician. A.C. Bailey, RR employee; Mrs Bailey. Alice Wells and Lucy McGinnis of Valley Center, Calif., Mr. George Adamski of the same place. The party had driven to a point about 10 miles east of Desert Center for a picnic lunch. At 1:30 a large cigar-shaped object was seen, hovering motionless, then moving eastward at great speed. Disappeared, then returned. Adamski set up his telescope at a more advantageous point about 1½ mi. from the rest of the party. About 2 hrs later a Disc landed about ¼ mi. from Mr. Adamski; he made several kodak photographs of it. About 20' in dia., translucent, silvery finish, portholes, 3 ball-bearings or rollers underneath. The disc hung 3-4 ft. off the ground. Adamski then saw a person motioning to him from a nearby elevation. This person was seen by the rest of the party from a distance and by binoculars- (this item not in the Gazette account). The man spoke "some English and also what sounded like Chinese" (Adamski)."Appeared to be about 23 years old, round face, ruddy complexion, gray-green eyes, long sandy hair, red-brown slipper-like shoes, pants tied around ankles, brown jacket." -- Adamski says he inquired "This your ship?". Visitor nods. "Is it interplanetary?" (visitor nods). "What is your purpose here?" (Pantomine with arms to mean mushroom-shaped clouds and concern about such clouds). Visitor refused to allow Adamski to enter the Disc. He referred to the cigar-shaped object as a mother ship; said that it rode about 500 miles up; said that he came from the M. ship. Said that he came from a planet but did not say which one. Said the M ship could be reached in a matter of seconds. Refused to allow "any pictures of personalities right now." Touched palms lightly with Adamski (Gazette says 'shook hands'),then climbed into Disc and took off. Adamski "noted a young boy or young woman peering out of one of the portholes". Visitor repeatedly indicated that his footprints had some significance and Dr. Williamson took casts of them. They appeared on hard rocky ground where Adamski's steps left no print at all (not in Gazette story). All seven members of the party agree on the presence of the cigar-shaped craft, of the Disc, of the "Visitor", of the foot-prints, and all six have confidence in Mr. Adamski's account of the conversation.

Round Robin is preparing a detailed account of the whole matter, together with comments by the MP Controls, interpretation of the symbols, and other related matters. One page by the Yada di Shi'ite is included in this Round Robin, but the Report as a whole will have to appear as a separate brochure. See other information about this brochure in preparation, in this issue.

Re 12-1-52

COMMENTS BY THE YADA DI SHI'ITE ON THE SPACE-MAN INTERVIEW:

(The Yada begins by saying that he and his associates have read the published account, studied the drawing of the foot prints and the plaster casts themselves, have visited the homes of all persons concerned and listened to their thoughts and conversations, and finally examined the desert site of the incident. He will now give us his findings in brief):

"The story is in the main true. The Disc did land and Mr. Adamski did carry on a conversation with the operator of said ship. But brother Adamski was so exicted he does not remember clearly all that was said. This particular ship was from the planet Venus. We would like to remind you, however, that the intense heat on that body, due to its proximity to the sun and an atmosphere heavy with carbon dioxide, make it highly unlikely or impossible that beings with the same organic structure as earth-man could abide on its surface. These Venus beings live in the ether of this planet.

"The markings on the plaster casts of the shoes are a symbolic language. In the center of the "A" shoe (right foot) are two lines crossing one another and converging on the oval design which is a Disc. This represents the fact that if, and only when the magnetic forces of the earth are CROSSED can they be made of sufficient power to be used as a driving force. The earth itself generates only a negligible amount of magnetism. But when these lines are crossed they become aligned with two other planets, Mars and Venus - which is what the two small circles on the left and right side of the crossed lines represent; the one below being the Earth. Venus, Mars, and the Earth drawing their magnetic currents from the Sun.

"On the heel of the same shoe is the ancient Swastika, indicating that those of most ancient times knew that magnetic forces of the Sun, Venus, Mars,and Earth moved from west to east between these four bodies. The circle at the far tip of the shoe with a line running through its center is the Sun. The curved lines on either side of both shoes depict the fact that when the magnetic lines of force are crossed they will create a path in which gravity is completely null and void. As all free forces travel in a curved line, it is quite simple to understand how by converging these lines upon one another their separate strength would be amplified; and at the same time an almost complete vacuum would be created in the orbit of motion they once held. All forces are really but one force, and that is electronic. Apparent differences arise from the nature of the work the force is committed to. Gravity,for instance, originates from vast fields of invisible matter, a cubic inch of which weighs billions of tons, and somewhere along its curved band it will turn into light, for its parts are principally made up of free electrons seeking to unite with an atom that has lost one of its satellite bodies or electrons. Gravity is "negative magnetism" until its flow comes in contact with the earth and other bodies in space, then it sets up a positiveOnegative, push-pull action between the poles of all such bodies. Was gravity not electronic in nature, that which you have today called radio, television, radar and the like, would be quite impossible, for all these do their work in different degrees of what may be called the "maga-gravity" band of the solar system,(magnetic-gravity). "

The foregoing transcribed by Mark Probert, clairaudient reception, Dec.1,1952.

The Yada di Shi'ite (Chief of the Shi'ite clans) is one of the best known among the famous Inner Circle Controls, for the deep-trance mediumship of Mark Probert. This mediumship has been under careful study for the last six years, by members of the BSR, and thousands of pages of such communications have been published. BSR Hdqrs are at 3524 Adams Ave., San Diego 16, Calif. (Meade Layne. A.M., Director).

HEADQUARTERS CLOSE-UP
or
Notes for our Associates

We are enclosing with this RR a summary of an actual encounter with a 'space-man' or 'Etherian', together with certain comments by the well-known trance Controls of Mark Probert, the Yada di Shi'ite and Ramond Natalli. There is every reason to believe that this incident is genuine, hence extremely important, and it makes the kind of news you will not get anywhere else. But before you make up your mind on this point, we recommend that you read the whole circumstantial account. It was too late for Round Robin, so we are going to put it out as a brochure - small, but 'don't judge a pill by its size'.

This business of the aeroforms (Discs, Saucers, Ether-Ships) is deadly serious. There is some kind of planetary crisis impending. Most of our Associates really want to know all the available facts, and are receptive and capable of understanding what is going on - far more than can be said of the average earthling. No other group anywhere, so far as we know, is trying to disseminate this vital information.

BUT we are going to have to ask our Associates to pay for this brochure. We send out a good deal of free material to our members - but BSR is literally a non-profit, public service set-up and has no reserve or endowment. Many members have been very generous and helpful, but still we are constantly hampered by the expenses we have - and the money we haven't (!)

Yes, we know there are other people in a similar fix.

If you want this forthcoming Release, let us know and we'll send it. But will you send us in return (or when you order, as you prefer) whatever you can spare and want to spare for the Aid-'n-comfort of Round Robin? Anything from $1.00, up, or down - there's no top limit!!

- - - - - - - -

Now a few homely facts about your-and-our BSR set-up. We have two rather large office rooms at the Hdqrs. address - with long tables, and shelves, and files files files, papers papers papers, books books books. We have one hand-mimeograph machine, three typewriters, and one addressograph of doubtful dependability. We mimeo the short stuff ourselves but have to send the rest of it out - RR, and all of the booklets and Transcripts and long releases (and does that cost us money!!). Our present office force consists of Mrs Margaret Locke, Miss Kathleen Banks (S.D. State College student), and yours truly the Director. These two helpers work part time only, tho we could easily find work for 4 or 5 full time helpers IF we could afford them. There's always a heavy accumulation of unpublished material, the kind that ought to be published - and mail which needs prompt attention piles up for 2-3 weeks before we can get to it.

There is, almost literally, no limit to the urgent and significant information that comes in to us, but which we have to exclude from RR and can barely touch in releases and transcripts.

The Mark Probert mediumship alone would (and should) have the full-time attention of at least one competent person. This is the best or near-best deep trance mediumship offered publicly anywhere in the world, has been studied and reported by us for six years past, and is an inexhaustible mine of scientific, philosophical and occult information.

We don't get this stuff to you because because we can't afford it.

We probably reach 2000-2500 people, though our paid-up subscription list is only about half of that (our publications are passed around a great deal). Our first issue, 8 volumes back , was exactly 25 copies. We have been urged to increase our

membership rates (to $10.00) and to raise the prices of our publications. (But we have so many fine personal friends who make sacrifices to pay for them even at present rates!).

If you have every put out a mimeo publication (or any other kind), you know where the money goes. Or figure, say, 1000 copies of RR at 25 pages each (50 reams of paper), the stencil cutting, mimeographing, collating all those pages, binding, addressing and stamping the envelopes, increased costs of everything, office time by the hour, handling and mailing. Add in the various booklets, releases and transcripts, and the correspondence, bookkeeping, file-keeping - and among bills payable add $50. office rent each month ... (Then add apologise for this itemizing and you have a kind of close-up of our BSR job.

What's the point of all this - if you have read this far? Partly that we want you to know we could give you far better service, more important material if we had $2.00 for every $1.00 that comes in. Also, that all receipts go back into the BSR work (your Director does not make his living out of the BSR). And that if 3-4-500 people could spare a dollar a month more, or $5.00 a year more, we could stop worrying about the rent long enough to build up our news releases.

Those of you who are especially interested may have some ideas about this situation. I wonder how many of you would pay $10.00 a year instead of $5.00. I can't bring myself to increse the rates that much, account of so many good friends who would simply have to drop out. Or how many of you would make it $10.00 instead of $5.00 provided we could get (say) 200 or even 100 altogether to do the same. We could send out a list of such helpers for your information.

No, we're not completely discouraged - but we are going to slip a copy of this letter into Santa Claus mail as if by mistake. Maybe the old boy will leave us some bird seed for Christmas.

Tuitissimus to all of you --- ML.

A few lines more about the Adamski "Interview": We call attention to the fact that seven reputable people were involved in this; that all of them saw the "mother ship"; that those not near by at the landing of the Disc saw the Disc-man from a distance through binoculars; that they saw him approach Mr. Adamski; that all saw saw the footprints soon afterward and made casts of them; that the phenomenon of these prints on hard rocky ground is vouched for by all; that none of these seven people has anything to gain, and two or three of them have much to lose by lending themselves to any kind of fraud.

The forthcoming Release we have just promised you consists mainly of a detailed account of the whole affair. A systematic effort is under way to break down our ignorance and complacency, and this is another step in the process. We hope all of our Associates will give close critical attention to every aspect of the matter - and not be misled by purported exposes' or any amount of ridicule. It has taken six years, but the pieces of the puzzle are beginning to fall into place.

In our promised Release we shall print a statement and an interpretation of the symbols as given by the Yada di Shi'ite. We may also be able to include a statement and interpretation by DR. KAPPA, a distinguished occult scholar who himself once had an unhappy encounter with the Etheric people.

Let us all remember, that we are about as competent to generalize about the etheric worlds and peoples, as a five-year-old would be to discuss the cultural status of America. We try to put two and two together - but there are worlds in which they do NOT make four. That, I think, is the first thing we have to learn - and it is high time we set about it. This learning, however, seems likely to demand not only strong desire and patience, but a good deal of courage as well.

BORDERLAND SCIENCE PUBLICATIONS: (Ask for descriptive folder of other items also).

MEDIUMS AND MEDIUMSHIP: Contents: Concerning Mediums and Mediumship-- The extraordinary phenomena produced by Kluski and Mirabelli -- the Question of Identity -- an approach to the Idealistic Philosophy -- Concerning Myself (autobiographical sketch by Mark Probert -- Comment on the Probert Mediumship. Compiled by Meade Layne and designed as an introductory booklet to the more sensational phenomena of mediumship. This is an attractive new second printing; mimeo., 26 pg. $1.00.

EXCERPTS FROM THE MARK PROBERT SEANCES: 1950 Series; Nos I and II, about 37 pg. each. Seances held in first months of 1950. Attractive format but some pages show off-set (mimeo shows through onto back of page); for this reason we offer them at $1.00 each instead of $1.50.

VITIC - The Physiological Effects of Carbon Used in Conjunction with the Permanent Magnet. Contents: (1) Data assembled by Brian Brown in his Dynamic Power of the Inner Mind (2) Comments of E.K.Krieger (3) The Psychic Investigation of Vitic (4) Nandor Fodor on Reichenbach, & miscellaneous comments (5) Addendum, concerning recent work on effect of magnetic fields on cellular growth. There is reason to believe that the carbon and magnet properly used charge the nerve ganglia with something akin to "vital energy", a nd this is confirmed by the Probert Controls. An important but much neglected subject. So far as we know this is the only existing compendium of such data. In an attractive new mimeo reprint, at former price of $1.00. (Compiled by Meade Layne).

THE MORLEY-MARTIN EXPERIMENTS - and - THE EXPERIMENTS OF DR.CHARLES W. LITTLEFIELD. Sensational (tho' almost forgotten) data on the effects of mental energy on microscopic crystals and micro-organisms - Translation of Maeterlinck's account of experiments proving the origin of life, under certain conditions, from "inorganic" material - Comments of Professor Charles J. Ryan -- the experiments of Andrew Crosse with the Acari -- Commnets of the Probert Controls. Again,this is so far as we know the only compendium of this information - but the facts are devastating to contemporary psycho-biological theories. Only a few copies left of an attractive reprint. Compiled by Meade Layne. Price $1.00.

THE AURAMETER BOOKLET: The first printing of this (mimeo) should be ready by June 1st. The first account in booklet form of an extraordinary new instrument, devised for water dowsing but actually capable of delineating the human aura, the presence of etheric objects and entities, a nd of thought-forms. Repeated experiments convince us that (to quote the Probert Controls) "this opens a new era in psychic research". The instrument is sold separately, hand-made, at $15.00 - but we recommend that you first purchase the booklet. About 80 pg. Price $3.00.

REPLIES TO QUESTIONS put to the Mark Probert Controls Professor Luntz - and - Dr. Nikki-Oi (Japanese). The questions concerned (1) what is actually happening when a hypnotized subject is sent out to some distant place - and what dangers are involved. (2) Can you tell us, in a general way, how levitation is accomplished?

Questions from Dr. F. L. of Elmira, N.Y.

Reply of the Luntz Control To Question # 1-

"The answer may give you some further insight into the relation of mind and body. Mind is action locked up in the human form, in the body or in the brain. Yet mind is everywhere present and we must be made aware of this condition either through another or through our own efforts.

"Consciousness is not here or there. In hypnotism you are setting aside the belief in the physical body and that one is locked up in it. You are setting aside the idea that space is something in itself. You are suggesting to the subject what point in space he should become aware of. There is not an actual projection of the psychic body, but an expansion of awareness and a localizing of it. You could learn to do this by or with yourself and so save much time and effort and expense.

"As to dangers: It may be that through wrong suggestions the subject will become confused and not be able to retract his consciousness - i.e., to find his body again. What takes place then may be called dissociation - there may be amnesia - or periodical phases of recollection and forgetting. Amnesia is often self-originated. But if bone pressure is involved surgery should be used.

"The operator should be SURE to give POSITIVE AND CLEAR-CUT COMMANDS.

Prof. Luntz.

Reply of the Nikki-Oi Control to Question 2:

"Among the Kouis, the low-grade humans, the masses of China, India and elsewhere, there are persons whose heads do not seem to contain any brain cells but only a little watery substance. This is their normal condition...

"Breath or Prana is the sole control of the body and its parts. It oxidizes the blood stream and burns out the toxins. It also so alters the rate of motion of the particles of the body that they resist what you call gravity. It builds screens against outer forces.

"Breathing can build a wall of light around you to protect you from all dangers.

"Breathing for levitation means concentrating on thing wanted- in this case a lifting force - or resistance to gravity - pressure as a physical force on the physical body. The rate of motion of the chemical substance is raised - the cell tissue of the entire body is excited. This does not cause resistance but causes cells to become lighter. Fire-walking involves the same principle - the body cells are raised to the vibratory rate of the fire.

Irritation comes from the unknown. Accept all things as forms of action, forms of experience - or if you prefer the expression, leave all things to God.

Nikki-Oi.

In levitation there is a definite separation of the cells of the entire body, and this results in less surface for gravity to play upon. More accurately, it is the different vibratory rate imposed upon the molecules and atoms which gives the effect of less surface. It is this separation of cells which gives rise to the phenomenon of elongation, which is always present when levitation takes place. Every atom of the body, all the cellular tissues are affected, but the vital organs show no ill effects.

The whole operation starts in the breathing. The breath controls every atom of the organism. The breathing is rhythmic and one visualizes his body as becoming lighter and rising. In the levitation of objects the process is the same. There is an expansion of the atomic mesh, which implies a change of vibration. The operator, (or several persons) fastens his gaze on an object, often points at it, and breathes rhythmically, visualizing the object as becoming lighter and rising... A phase of levitation is seen in the familiar experiment of four persons lifting a fifth by their fingers only, while breathing in unison... Teleportation of course makes use of a similar process. Breath control plus concentration.

It is true that some of the flying objects that puzzle you (not necessarily the disc-shaped ones only) come "even from beyond the galaxies" - that is, from distances measured in hundreds or thousands of light years. It is clear that there can be no actual "crossing of space" by any material object (as you know 'matter'), in such cases. The thought-pattern of the "craft" is teleported into (say) your atmosphere, the vibratory rate is there "converted" and the craft becomes visible and tangible to your senses. The body of the operator, being of etheric matter, is teleported as easily as is the ship itself ('you ARE where your consciousness is'). The operator teleports himself and the ship instantly, without any 'crossing of space'. But I am referring only to your visitors from immense distances.' *

The Yada di Shi'ite on the California earthquake.

On the afternoon of July 22 the Yada began talking about this subject, and again referred to it in the evening of the same day. His last comment is here summarized first, to the following effect: 'The great crack in the San Andreas fault appears to be settling in such a way that no immediate danger of another serious quake is apparent.' --- His earlier comment was: 'the crack is now about 100 feet wide and is an extreme danger point. If a second quake occurs of equal intensity (with the first) parts of the California coast from Long Beach to San Francisco will be submerged... Effects of a second quake of this intensity will be felt well to the east of the fault line as far as Salt Lake ... When the great quakes occur later on (in Japan) the Hawaiians and the Philippines will suffer severely ... But at least one severe shock may be expected in California within the year (1952). We can make approximate forecasts by observing the behaviour of the ether stresses - they show a kind of bouncing motion, usually about a week before a quake.

Yes, the compass needle will show deviations about 20 minutes before a quake. The wide flashes of light seen on July 21 (in sky over Sou.Calif.area) are produced by a bending or fracture of the ethers, which are enormously dense... Yes, there are underground caverns of considerable extent under your area... Yes, quakes are worse in a silt formation than in granite. The Imperial Valley region is dangerous. There is risk of inundation from the Gulf of California... But it seems likely that the east and north of the U.S. will be the next to suffer disaster from storms and floods. The accumulation of ice at the pole is also affecting world weather by causing a nutation (nodding, wobble) of the axis.

Your Etherian visitors and helpers have largely succeeded in containing the atomic radiations within the ionosphere, so that only the earth will get the worst effects. (end, Yada comments)

---

* Dr. Nikkioi was a Japanese physician and student of occult matters, who 'died' in 1918, according to his own account. He is one of the newer but most highly esteemed members of the so-called Inner Circle of the Mark Probert communicators.

ITEMS AND TOPICS FROM THE PRESS

"Glowing like Hot Coals, They moved at 1,000 miles per hour"! Eight objects flying in formation over Chesapeake Bay. Reported by two airline pilots --- "Weird object Puzzles Airmen" over No.Carolina --- Flying Saucer over Hanford atomic plant (Wash.) Lighted Ball Cruises in Sky Near Richmond -- Tidewater Virginians See Saucers -- Mysterious Spheroid Over Virginia --- U.S. Airforce Does an About Face on Flying Saucers --- "Skies over Richmond are alive with mysterious traffic"; red balls, blue lights, cigar-shaped lights, flat thing with lights, something white going up .. etc. "Aerial Night Life Wingding"; white, gold and green object at high speed --- Large silver ball leaving trail of smoke, at high speed, over Wichita --- Luminous Objects Flood Southwest Skies, Says La Paz... reverse direction,,, high speeds, spherical, give off steady yellow light --- Gigantic flying oyster over Kansas --- Radar screens pick up eight flying objects... glowing red-orange discs flying in formation (over east coast from Washington south) --- "Discs" seen over Washington, D.C.--- Four objects over San Diego, Calif. --- Object over West Texas, brilliant white, would "jump two miles or so, then hover. The propeller of the observer's plane "just disintegrated" --- A "rocket authority" at Wright Field tells Project Saucer personnel that "the saucers are interplanetary and no other conclusion is possible --- Strange flat milk-colored object hovering over a weather balloon, over Alamagordo--- Eighteen circular dull-white objects over the Las Vegas test site --- Four Philadelphia policemen see a "mysterious object about 6 ft. in diameter floating to earth"! When touched by the hand it began to dissolve.....

As was to be expected, there is a spate of predictions and 'prophecies' from mediums, psychics, 'sensitives', occultists, spiritualists , cults and cultists of all degrees. Their chief point of agreement is impending misfortune - but some whom we think dependable insist on 'no war with Russia' - or, 'no world war before 1960'. The Mark Probert Controls, always cautious about predictions, say there is a chance of postponing the war, but regard October-November '52 and February '53 as very dangerous. They think the Calif. fault line (San Andreas) has settled down for a time tho' there may be one more sharp quake and many minor ones.

We are happy to announce that DR. KAPPA, largely restored in health, has offered to give us a partial account of his remarkable experience with the "Etherians" and some portions of his knowledge of the etheric world. He believes there is no immediate danger of war, but that a grave planetary crisis is at hand. We esteem Dr. K. above any occultist of our acquaintance for his knowledge, integrity, and occult powers.

The BSRA have two principal "Disc" publications; The Ethership Mystery",and "The Flying Saucers" by Rolf Telano. ($1.50 & $1.00). There is nothing contradictory in these two, and the latter supplements the first. The Telano communicators insist that most of the Discs are under the control of excarnate humans now living on etheric Venus, and give detailed description of some eight types of flying craft now being used. The MP Controls tell us that some excarnate humans do pass from the "astral" onto the etheric levels, and remain there. In my opinion the Telano manuscript deserves close attention and wide circulation. The transcriber is an engineer, a resident of Ohio, NOT a professional medium or psychic, known to many Associates and highly respected by them. His ms is confined to the disc-shaped objects, but is a distinct contribution to this highly complex subject.

In fairness to our Associates, concerning the Last Days ("Ms.from Guatemala): Dr. Kappa (referred to above) believes there is a "certain amount of truth" in the ms., but that the predictions are worthless. We have stated elsewhere that Max Freedom Long and William Dudley Pelley disapprove of the publication of the Last Days.

RELEASE 3-A-52 - to accompany RR VII-6.

LIFE magazine for March 10, 1952, carries excellent photos, paragraph of explanation, about the "skating stones", Death Valley area. Some of these weigh up to a quarter ton, and stand at the end of"gouged out paths which show they periodically respond to unknown forces and skate about on the flat earthen floor. - But no one ever saw the stones move'-- etc.

On the evening of March 17, the trance Control of Mark Probert, the Yada di Shi'ite, made the following comment on this:

'There are places which are haunted, just as there are haunted people. This movement of the stones is a kind of haunting. It is what what you call a poltergeist action. But this kind of poltergeist may not "really" be an entity. There is such a thing as a mechanical poltergeist, a kind of robot, if you like. And then, Wind and Water, Fire and Air, may have intelligent action. There is intelligent electricity, electricity which has a kind of life and awareness. Compare the fireballs. Dr. L., can you tell me what intelligence is?

ML. NO!

The Yada: Thank you!

'Well, force turns from one form into another. Life and form are in constant motion. A living person, sleeping, or in dream or nightmare, may move away from his physical body and go and do the strangest things, by projected thought forces. Mind exerts pressure on the ethers. It cannot affect physical objects directly, but has to work on the molecules and atoms of matter first, and through the ethers. Yes, there is an actual ray from the eyes. There are forces which obey the law of inverse squares and there are those which are not affected at all by distance.

TELEPORTATION IN TIME

MAGAZINE DIGEST for Jan. '52 carried an article by Jack Finney entitled "I'M SCARED". Teleportation (apportation) in space is universally accepted by occult students, as is also, of course, the projection of consciousness in both space and time. But the teleportation of the 'whole person', mind and body, clothing and money and pawn tickets, from (say) a street in 16th century London to Times Square in New York in the mid-19th century - where he turns up utterly bewildered as if on a new planet -- that kind of happening, IF it exists, raises some extremely subtle time-space problems - to say nothing of an over-all crop of goose pimples. I inquired of the Yada concerning this abortion of reason, and he seemed considerably amused:

"Phenomena! Phenomena! Never in 5000 years have I been so fascinated by phenomena! Certainly, that kind of happening takes place. Usually the person teleported has no memory, but whether he has or not, he is greatly confused by his strange surroundings. He has entered into a time lapse, a new awareness state. His identity is not ended. He has gone into the absence of time which lies between the quanta. Here is some one sitting or moving about, then all at once he is gone. He would not say that he was thinking of anything taking place that was unusual. But the mind is astrange thing. It is not a singular

action thing. It has endless forms of action, and any one of these may create a change in the physical structure of the body - all the way from a change in the functioning of the glands to the disappearance of the whole body. Such a person might keep his memory, and be something like a ghost, and then he might be able to return whence he came.

When a materialized form appears to some friend of years past, and comes wearing the same clothes as long ago, he is doing more than making himself easy to recognize; he is trying to pick up where he left off, trying to repeat what happened long ago. It is an extension of memory activity. When you go back in memory to your childhood you are recreating the child form and its clothes and playthings."

(The Yada seems to imply that memory reconstruction carried far enough could reproduce, recreate the former body and its environment also. Somehow, this seems to apply to the future also. By some kind of alteration of consciousness, one "slips into the cracks" between the space-time quanta, emerges somewhere else, some time else. Now the body, to quote Geley's polysyllabic phrase, "is the idioplastic product of the subconscious psychism". It is made and unmade by the mind, supreme master in its own house. And is the "external" world in any different case? If an hour had 61 minutes in it, the positive sciences would crumple like a house of cards. The existence of a thing lies in our perception of it, said Berkeley - and 'what a thing looks like when nobody sees it', God knows, doesn't tell (as the saying goes). If I fall out of MY time-space series, trying to get from A to C (or maybe to B) I turn up at BETA in an Athenian grove, say 500 BC, or at BETH, chanting psalms before Solomon. It was probably a 'philosophic' exposition similar to this that made Empedocles jump into the crater of AEtna (if he did) - and the quantum theory got us into it, which involves Max Planck and the Yada di Shi'ite and maybe lets us out.

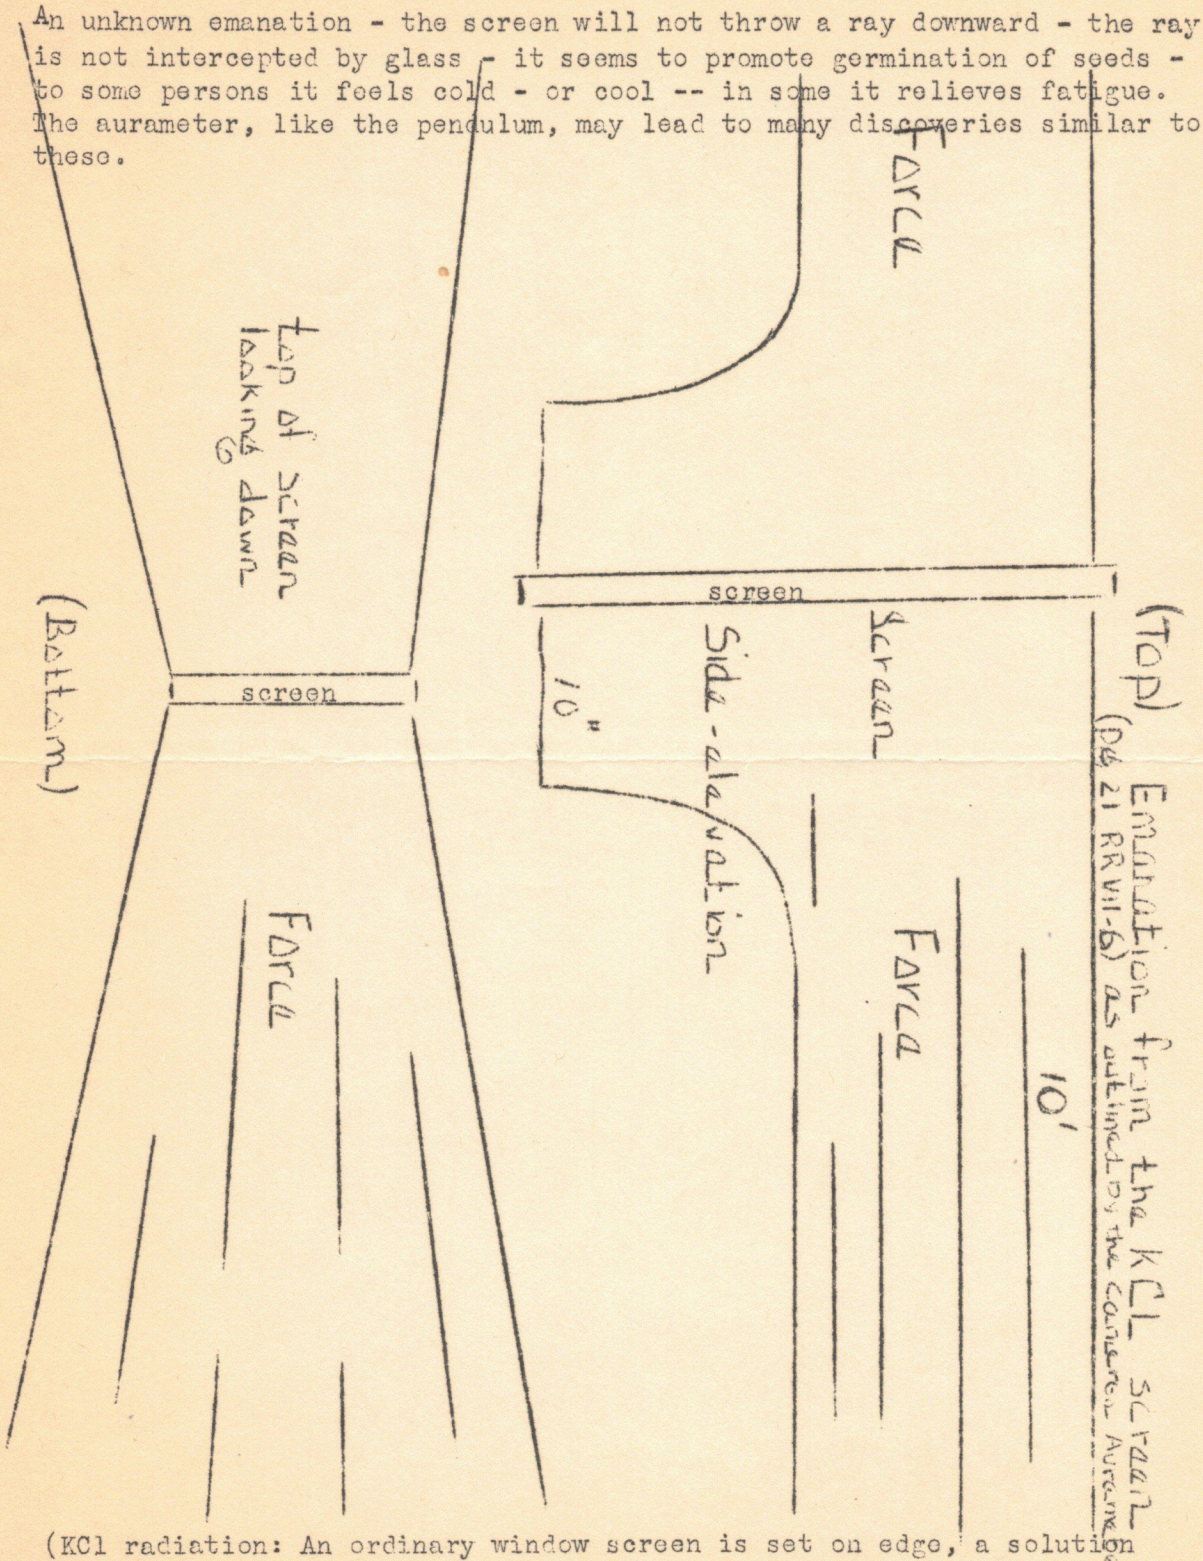
THE DESTRUCTION OF THE CIVILIZATION OF YU

According to the Yada this civilization existed some 500,000 years ago, in the Himalayan mountains, and comprised some 180,000,000 inhabitants. Of these, more than 80,000,000 perished in a series of natural catastrophes; the survivors migrated into China and India. Of this dreadful time the Yada retains some memory:

" Black cracks in the ethers! Have you ever seen such a thing? Hope and pray that you never will. The whole of heaven furrowed with black gashes, terrifying beyond words. Great winds arose, of terrific velocity. Then from the black cracks flame poured forth - vast sheets of flame. Waves of fierce heat - and then all in a moment came a bitter cold. Sir, do you know that all primitive energy is heat - and that heat can be turned into anything - into cold, into ice, into rain, into solids, only by changes of its vibratory rate. May you never see such things yourself, unless you are out of the physical body. Last came the creeping cold, and all that was YU now lies covered by the ice. Now this was an ether quake - it began in the ethers but all the material world responded to it. And what was the source and cause of it all? I can only reply, that if 180 million people are distressed and harrassed and emotionally disturbed, if fear and hate and greed and cruelty prey upon them for a thousand years - something in Nature will react, will give way before the pressures so generated, the power so dreadfully sent forth."

THE SEANOR SCREEN

An unknown emanation - the screen will not throw a ray downward - the ray is not intercepted by glass - it seems to promote germination of seeds - to some persons it feels cold - or cool -- in some it relieves fatigue. The aurameter, like the pendulum, may lead to many discoveries similar to these.



(KCl radiation: An ordinary window screen is set on edge, a solution of KCl in water is placed in a container, a few turns of wire inserted in the solution and the other end of the wire attached to the screen). The top of this drawing is to your right.

BORDERLAND SCIENCES
RESEARCH ASSOCIATES
HDQRS. 3524 ADAMS AVE., SAN DIEGO 16, CALIF.

ALL BSR ASSOCIATES:

The following note from Richard Shaver is self-explanatory. Perhaps some of our Associates will cooperate with Mr. Shaver. I believe this is a worthy enterprise and that he should have assistance.

M.L.

Dear Meade Layne:

I wonder if you could contact me with someone able and desirous of helping me complete a dictionary of Mantong words -- someone interested in languages who would correspond with me, type up and correlate what work I can do on this -- needless to say - exhausting and demanding work.

As you may know I had a more or less bad crack-up and haven't been up to par since - but whatever comes, I have a mass of material on this language which I believe is mighty important, far more so than anything else I know about. But how to go on with it when every minute is taken up with just getting dough for regular expenses I can't figure.

Could give a few hours a week to it if someone else would help--

Mantong is a concrete proof of the nature of the past of man and its every word contains clues -- which add up in any group of Mantong words to pictures of their thought processes and their knowledge of the basic laws of nature which are a great education in themselves. It is a very gigantic thing, and it needs a lot of intelligent help in its proper development and presentation, something I have never had.

Your friend,

Dick Shaver

January 1952.
Route 2 Box 39
Amherst, Wisconsin

CORRECTION FOR PROJECTS HERMES DIAGRAM, RR VII-4

(1) There should be a line on the diagram connecting the two dots at the top. That is, the plate connects to the screen grid line. It was thus shown on the original diagram, but evidently was missed in cutting the mimeograph stencil.

(2) The Meissner coils are ordinarily used in small battery and 3-way portable radios, and are designed to cover the standard broadcast band, when used with the proper condenser. However, the specified (by Meissner) condenser for the oscillator coil is 108 to 180 mmfd., and for the other two coils is 280 to 420 mmfd. Since the condenser specified for "project Hermes" is only 3.9 to 14.5 mmfd., I am wondering whether the coils will work properly -- although I presume that the communicator knew what he wanted, so it may be O.K.

Interference with research projects seems to be the rule out your way. Essential materials, documents, etc., seem to have a way of just being absent. Perhaps there is an over cautious group on some plane or other out there. "Project Hermes" was, however, checked and cleared on the etheric level, so they have no reason to interfere. In case you are not familiar with the firm, the coils are listed by Burstein-Applebee Co., 1012-14 McGee St., Kansas City 6, Mo. The Meissner #'s 14-1071, 2 and 4 are B-A's "stock numbers" 17B1149, 1150 and 1152, respectively. They are listed at 88¢ each, plus parcel post and insurance. Of course, they may not actually be in stock, even though listed in their catalogue.

The tube diagram might possibly cause some confusion, as two of the connections shown are internal, there being only 5 leads from the tube. In case your tube is not coded (some are not) the connections are, from left to right, with the red dot at the left: plate - grid #2 - neg. fil. and shield - grid #1 - pos. fil. and grid #3, (RMA numbering) "A" battery 1.25 V - "B" battery 22.5 V. Perhaps you are familiar with this information, but I am listing it in case you do not have a Raytheon manual handy.

PROPHECIES OF 1953

by the author of Last Days

Contents includes: (Ch.1) Prophecies of the Great Pyramid, based on the lost science of cycles. Civilization will be changed by August 20, 1953. -- (Ch.2) Prophecies of Nostradamus, Reddings, and H. G. Wells. The latter two correctly predicted outbreak of World Wars I & II, and both predicted a third war for 1953. -- (Ch.3) Researches of Dimbleby and Bartolet on the Eclipse Cycle as a basis for prediction. Destruction of civilization in 1953. -- (Ch.4) Scientist J.K.,student of cycles, who predicted outbreak of Korean war. What he predicts for 1953.
(Ch.5) Are the flying saucers an omen of atomic war? Evidence that this is the case. -- (Ch.6) Seven prophecies for 1953. Year of Armageddon. -- (Ch.7) Prophecies of an Uranian. Transcriptions of interplanetary communications. -- (Ch.8) Aftermath of Armageddon. The Four Horsemen. -- (Ch.9) The new Promised Land. -- (Ch.10) The lean years ahead and how to prepare for them.

Chapter 10 is followed by FOOD SUGGESTIONS - What to choose and how t to preserve essentials foods against a time of scarcity.

PUBLISHED BY TALK OF THE TIMES, BOX 1467, SAN DIEGO 12, CALIF. Released by the NEW AGE FOUNDATION, BROOKLYN, N.Y. About 45 pages mimeographed. Orders can be sent either to Talk of the Times or to BSRA Hdqrs, 3524 Adams Ave., San Diego 16, Calif. Ready by February 25th, 1953.

$2.10 ea. -- $2.25 1st class -- $3.00 by air mail

IN ANNOUNCING THIS BOOKLET, OR ANY OTHER WORK DEALING WITH PROPHECIES, the BSRA is not committed to any uncritical belief or acceptance of particular forecasts; nevertheless much of the material here collected agrees closely with predictions from other sources - and an interest in such matters is natural and legitimate. We have also been assured by competent persons that the FOOD SUGGESTIONS following Ch. 10 are sound and valuable and should be generally known. For these reasons, though the book is not a BSRA publication, we have agreed to make this announcement and to handle orders for it. Associates ordering from our Hdqrs. may have a copy sent on approval if desired.

San Diego, Feb.20,1953 M.L.

"SAUCERS AND SORCERY"

A BOOK WE RECOMMEND -THOUGH WE HAVEN'T READ IT --

The reason we haven't read it - it is only now in process of publication. The publishers: Sidgwick & Jackson, Ltd.,of London. We haven't the street address for this firm - so send your inquiries and orders in care of the author, DESMOND LESLIE - of 36 South Lodge, Grove End Road, London, N.W. 8, England. Mr. Leslie is an experienced writer with a fine scholarly equipment, who has recently compiled THE FLYING SAUCER MUSEUM - historical data on aeroform sightings - and he is much in sympathy with our BSR interpretation.

A sympathetic interest in tne BSRA has been steadily increasing in both England and France, and Mr. Leslie has included much of our data in his forthcoming"SAUCERS AND SORCERY". One unusual feature of this book will be translations from the old Aryan book, the SAMARANGANA SUTRADHARA: e.g.

"Strong and durable must the body of the vimana be made, like a great flying bird of light material. Inside one must put the mercury-engine with its iron heating apparatus beneath. By means of the power latent in mercury (atomic??) which sets the driving whirlwind in motion a man sitting inside may travel a great distance in the sky in a most marvelous manner.

"Similarly one can build a vimana as large as a temple of a God-in-Motion. Four strong mercury containers must be built into the interior structure. When these have been heated by controlled fire from the iron containers the vimana develops thunder power through the mercury. And at once it becomes like an ornament in the sky."

"The subdivisions of the vimana's movements are: Vertical ascent , vertical descent, banking, slanting, forewards, backwards, normal ascent, normal descent, progressing. Through proper adjustment of all working parts it has perpetual motion" (i.e., using air as fuel there is non-stop flight. cf. Churchward's MU books, and Scott Elliot's "ATLANTIS".)

"With the help of these machines human beings can fly in the air and heavenly beings can come down to earth."

"It can be made invisible. It can carry passengers. It can also be small and compact. It can move in SILENCE. It can move to TUNES AND RYTHMS."

Read, I beg of you, Rolf Telano's account of the OLON alongside this. The VIMANA is the OLON beyond any doubt. VIMANA is still used as colloquial word in India meaning 'aircraft'."

In the MAHABHARATA, Asura Maya has a great vimana 12,000 cubits in circumference with "four strong wheels". The VOKU is 7000 x 500 about 16,000 feet in circumference. Adamski's Saucer had three strong "wheels" beneath it.

The Vimanas, say the old books, could go to the "Surymandala", the solar regions or out to the "Naksatra mandala" the stellar region.

In modern language, the early Olons could travel through the solar system or out to other systems in space."

The price of"SAUCERS AND SORCERY" will be $3.00 -- 1 English pound (on our typewriter - 1/0/0. Get an International Money Order at the Post Office -- the Post Office sends the money -- just keep a memo of date and amount. OR SEND INQUIRY OR PENDING ORDER. IF ENOUGH INTEREST, The Viking Press (USA) WILL HANDLE IN THIS COUNTRY. A display of interest here will hasten publication.

M.L.

PROJECT SURVIVAL & SERVICE: - and - AMATEUR RADIO NET -

The former of these was (and is) under direction of BSR Assoc. Don York, 2939 - So. 10th St., Kansas City, Kans. Assoc. York was chiefly concerned with collecting "emergency addresses" - i.e., his files would show the address where a member could be reached if displaced by some disaster - usually "Gen.Del." of some small and fairly remote place. --- The Amateur Radio Net was designed for help of BSRmembers and for public service generally: This is under the direction of Assoc. S.N. Green of Bayfield, Colo. (Gem Exchange). Associates York and Green are cooperating, since the two services obviously interlock. At present we cannot handle these through the San Diego Hdqrs. Write to either of the Associates if interested.

SAUCER MUSEUM: On another page we have described a forthcoming book by Desmond Leslie. This includes a historical summary of about 15 pgs. of Aeroform sightings - and very interesting reading. We have mimeographed this summary and can supply it at $1.00 - but particularly recommend the book itself, which devotes about 20 pages to BSR activities.

COMMUNICATION WITH THE GUARDIANS: As explained elsewhere, messages are being being received both in code and by voice (radio), which cannot be tuned out by changing the wave length. Assoc. S.N.Green (v. para.1, sup.) recommends leaving the radio turned on for (say) an hour or more on Sundays, 4:00 pm E.T. -- 3:00 pm C.T. -- 2:00 p.m. R.M.T. -- 1:00 pm P.T. -- Assoc. E.S.Schultz suggests making a tape recording if anything comes through. Do not try to transmit anything. Instances reported to us are in our opinion authentic, but the phenomenon is still sporadic and the material cannot yet be collated. Dr. George Williamson may shortly have a publication on this subject. The Guardians may yet use this as a means of contact with all earth people. (Please do not ask for a documented study of this data - we do not have it - we are only trying to break ground for events to come).

THE SECRET SCIENCE AT WORK: This is Max Long's new book on HUNA, eagerly awaited by everyone who has read "Secret Science Behind Miracles" including hundreds of BSR Associates. Autographed copies may be had from Max Freedom Long, HRA, PO Box 2867, Hollywood 28, Calif. (352 pgs., $4.00 post paid, plus sales tax in California). We are confident that this is unique and valuable material, and hope to review it in our next issue of RR. S.S.W. WILL BE READY APRIL 10. Send orders to Max Freedom Long at address given (not to BSRA).

THE SPACE SHIPS OF OAHSPE: Publisher Wing Anderson (2208 W. 11th St.,Los Angeles 6,Calif.) has a mimeo. list of references, page 49 verse 18 to page 734 verse 10. Allowing for terminology, many of these Oahspe passages fit in with current phenomena, as well as with the classifications given by Rolf Telano in BSR brochure 1-B-52. Send Mr. Anderson a stamped and addressed envelope if interested.

Carbon-rod & magnet experiments but using some form of silicon, say bouncing putty instead of carbon, are suggested in our last RR viii-5, pg.5, Note by R.T. The whole of this note merits close attention. Any data, "occult" or otherwise, on silicon as "alive" or as a basis for life-forms (corresponding to carbon) would be most welcome.

FIRE PHENOMENA

(We are in receipt of the following interesting notation from BSRA Regional Director H.M. Wagner, DeFuniak Springs, Fla. Assoc. Wagner prefaces his note by saying: "This will not be a proper report because the information herein contained was given under my agreement to keep names and location out of it; hence as a report valueless - but of interest since the facts have been established by investigation.")

"A family well known to me left home about 6:00 pm. At about 11:00 pm a neighbor passing and looking at the house saw nothing out of the way. At about 12:15 am. another neighbor saw flickering lights which caused him to enter the house where he found fire.

"An upholstered chair had been completely demolished, the rug beneath the chair was burned, and a space below the chair,over which the hardwood surface was gone down to the underfloor which was scorched but not burned. A handbag which had been on a chair seat gone (burned), but metal coins smoked but undamaged. Books within three feet smoked but not harmed. Stringers of soot over everything including clothes in closets in all rooms of the house.

"A peculiar fact is, that in the kitchin some distance from the room where the chair was, canned foods had been bulged and the cans leaking, plastic dishes melted and other evidences of intense heat: this while books much nearer the fire showed nothing but discoloration from smoke. Some leather bound volumes were as flexible as ever, with no indication of having encountered intense heat. People living in the house use cigarets, but none had been lighted since 3:00 pm. At the instance of authorities the fire was not reported in the news and everything about it was hushed. Nothing burned but the chair (and the small adjacent space mentioned)"

-end-

H.M.W.
5-19-53

For once, the "authorities" have not diseovered the mischievous brat, match-nibbling mouse, or incendiary fireflies. A long and frightening list of similar happenings could be compiled from even the last two or three decades. Occultists have much to say about them, but who listens to them? "Orthodox" thinking jeers, guesses and fumbles. We note, however, a healthy reticence among "experts" of late. Perhaps the Saucers & Sorcery era is affecting them. This doesn't mean that we know exactly what happened in this Florida case. There are a half-dozen possible explanations, no oneof them wholly provable. (Consider the Reeser case in this connection).

"Invisible tormentors" have been biting an 18-year-old girl of Manila, P.I. Mayor of Manila, with the medical examiner, news men and "other observers" investigated, had a firsthand or first-finger demostration. "Clarita's hand was bitten while I was holding it", says the Mayor. "The finger was bitten under my palm. What it is is beyond me. This is something that goes way back to the dark dim past." The Mayor is quite right, of course, but if he had been mayor of Podunkville USA he wouldn't have said that. He added that the medical examiner was "scared stiff" and that he, the Mayor, was going to get the Archbishop, bell, Book & candle - muy pronto.

"Cell subdivision experiments point to new theory about virus ailments" is the L.A. Times headline. 'Findings of one Dr. Kanner suggest that a single cell can be divided into millions or even billions of parts which can live and multiply...upsetting the belief that the cell is the smallest unit of animal life.' We're quoting the gist of this because it reminds us of a remark by one of the M.P. Controls:"Maybe some day your biologists will realize that there are cells within cells just as there are atoms within atoms, and no thinkable limit to either series" (Prof. Luntz). If he had left out that 'some day' we could feel encouraged.

(B -

"A-Bomb's Effect on Babies Shown": (Heading to item in L.A. - INS) dispatch).

"A Japanese physician reported Friday that studies show that 25 per cent of the children born to women exposed to atomic radiation while pregnant during the A-bomb drop over Nagasaki turned out to be feeble-minded. Dr. J.N. Yamazaki, now a faculty member at the University of California at Los Angeles made public findings of a group of physicians he headed at Nagasaki to the convention of the American Association on Mental Deficiency."

" Atom Blamed for Frozen Crops, Nausea": (Albuquerque - AP): 5-14-53.

"Prospectors say Western New Mexico is being bombarded with so much radiation from atomic tests that at times it's impossible to test for uranium ore. Fruit growers in N.W. New Mexico are blaming frosts on atomic tests in Nevada. Residents in one area think a wave of lightheadedness and nausea may have been caused by radio-activity. Atomic Energy Commission officials discount all complaints*.

(Can one imagine their doing anything else?)

"Prospectors in the Gallup, N.M. area, where uranium hunting has reached the proportions of an industry have been unable to hunt for the precious ore at times following tests. The radioactivity count jumped so high that the Geiger counters couldn't distinguish radiation in the air from that of the uranium ore, the prospectors say.

"A spokesman for fruitgrowers in San Juan County, N.M. made up a list for newsmen showing that three atomic tests were made between 48 and 60 hours before heavy frost damaged fruit. The first explosion listed, April 6, occurred two days before temperatures fell to 24 degrees and ruined apricots and peaches. After an explosion May 1, half the apple crop in the area was frozen. The rest of the peach crop went two days after the May 8 explosion. U.S. Weather Bureau officials in Albuquerque said:

"Purely a coincidence. We've been having unusual weather throughout the spring".

A wave of nausea and lightheadedness among residents of Gallup had doctors puzzled . They disagreed on whether it might have resulted from radioactivity which has at times ranged up to five times normal.

The AEC stated flatly there have been no dangerous concentrations of radioactive fall-out in any part of the country outside the controlled area at the Nevada test site. But it added that higher than normal levels of radioactivity have been measured in isolated instances and for short periods of time."

-end-

Reports from the Japanese areas reaching the RR office have always been contradictory, but it takes several years to assemble data such as are given in the first paragraph above. In another decade or so (our guess is) the number of idiot children and sterile adults will reach appalling figures (if any of us are here to be appalled by them). We think all statements about what constitutes a "dangerous concentration" are guesswork and conjecture. A sop to the public - based, of course, on public policy, since the government does not dare stop the manufacture and testing of atomic weapons. We have the bear by the tail, and whether to hang on or let go is equally dangerous. The BSR Directors are not recommending any particular course of conduct - but only to evaluate smug official reassurances at something like their near-zero worth.

Let me summarize once again some of the probable major factors: Extremely dangerous geophysical (planetary) conditions are being aggravated by the atomic explosions. The solar system is entering a region of very dense ethers; there is a partial disruption of the ionosphere and an accelerating disintegration of earth strata. Atom-fission products are hastening this disruption. Further, it may well be that only a series of natural disasters can prevent the equal misfortune of a world war. Many strange natural phenomena are to be expected - and the next six months, maybe three, should give the clue to our terrestial future.

ml

(Excerpts) THE NEW AQUARIAN AGE -- JOHN S. EASON -- LECTURE 38

We are living in an extraordinary period that is unmatched in history! The tempo of time is hastened; great changes now come in months and even in days, the like of which were not previously brought about in centuries. Change is the dominant note of the times. The principle of disintegration is bringing about the destruction of the fixed, crystallized conditions which have become so rigidly established within the Piscean Age or Era. . . . Our solar system, including our earth, is passing through a period of transition into the next sign of the Zodiac-Aquarius. . . . Security lies in facing the fact that we are in a period of great changes and we should, therefore, boldly welcome those changes as new adventures in living.

As we have stated in earlier lectures, the proof that the world is passing into an utterly New Age is established by the phenomenal things which are going on in the heavens!. . .

Where are we now in that period of transition? Many people believe we are already in that New Age; but present experiences and signs in the heavens would strongly indicate that we have experienced so far only the rumblings of the coming of the Aquarian Age. But how shall we know when the Piscean Age has ended and the Aquarian Age begun? We shall know by the final and great earthquake (Revelation 16:18) and the phenomena (physical and meteorological) that are to accompany that earthquake. Some of the effects of this super-convulsion which will involve the entire globe (more or less) are given in Zachariah 14:4-10; Ezekiel 47:1-12 and Isaiah 11:15. Such prophetic warnings are now becoming confirmed by the researches of seismologists.

When the later harmonious day will arrive cannot be determined just yet; but signs of its coming are already discernible. The Great Pyramid chronology indicates that --

(1) within the Western Democracies (comprising principally the Anglo-Celto-Saxon race) by 1953 (circa),

(2) within all nations by 1986-2001 A.D.

the Aquarian Age will be in full function.. . . .

The New Age has already been conceived some 20 years ago! -- January 21, 1933, to be exact. August, 1953, to June, 1954, is the short period (286 days) during which the collapse of the Piscean Age is expected to become complete!.... .....The moment which is to signal the passing of our solar system completely out of the sign of Pisces into that of Aquarius, will be accompanied by a world-shaking earthquake. . . .

Geologically speaking, earthquakes are very intimately connected with eclipses -- of the sun and moon. When there is an eclipse of the moon, the earth lies precisely between the sun and the moon -- even if only for a few minutes. Actually, these three bodies are in complete alignment. That being so, the gravitational "pull" exerted by the sun and moon upon the earth's surface (where the shadow of the eclipse falls) places a great strain on the crust of our planet.

But it is when there is an eclipse of the sun that the gravitational "pull" on the earth's "shell" is the greater, because it is then that the sun and moon are both on the same side of the earth and, for the duration of the eclipse, their "pull" on the earth are combined and therefore the area (earth) in the path of the moon's shadow is more seriously in danger of adjustment. That may be the reason why Asiatics and other like races look upon the sun's eclipse as an evil omen! They know from past experience how an eclipse leaves, so often in its wake, a trail of destruction along the path of the shadow it casts on the earth. Sometimes, an earthquake will come very shortly after the eclipse; yet,

again, it may take months before the earth's crust will adjust itself, there being many contributing factors which enter into the timing of that adjustment (earthquakes). . .

There is the area of the Jordan River and its entire valley, reaching southward to the Gulf of Akaba; another is the area of the lower Hudson River (New York State), which fault runs northward toward the St. Lawrence River (Canada); and one of the worst faults in the earth's crust is that which runs parallel to the mountains along the Pacific Coast, from San Francisco to San Diego. Here is a very deep, vertical split, right through the solid rock. Pressures against the two surfaces are ever increasing. Already they are slipping sideways and, at any moment, will split asunder that whole mountainous coastal area.

But it is a most astonishing thing that there should have been two eclipses in 1952 and five are due this year (1953)! As far as is known, this phenomenon is unknown in the history of our planet! And 1952 was a "bad" year for geological disturbances on the earth: An increasing of earthquakes and signs of a very definite build-up of internal pressures under the earth's thin crust. Extinct volcanoes are showing strong indications of becoming "active"once again. Such is the case of Mt. McKinley in Alaska, where lava and smoke are not only pouring out of the crater but are bursting through the sides of this mountain. Temperatures just taken of the active volcano of Mt. Vesuvius registered at 1300 F. Like conditions prevail in Indonesia. . . Following the eclipse of last fall over Eastern Europe and the Middle East there came the destructive 'quake of November 4; the worst quake on record and 100,000 lives were lost.

Since then we have had two eclipses, Jan. 29 & Feb.11 ('53). The former produced a cyclonic storm over the North Atlantic and the floods in Northwest Europe. The lunar eclipse of Feb. 13 was followed by a series of earthquakes in Turkey and northern Iran. The solar eclipse of July 11 ('53) may be productive of serious consequences; the moon's shadow will pass, most likely, over the Middle East, including Palestine. Another lunar eclipse on July 26 (15 days or "one hour" in prophecy) indicates unexpected "explosions" (violence, revolution). The solar eclipse of Aug. 9th will bring on the intensive phase.

The predestined super-crisis, whatever its nature may be, will appear on August 20th, 1953.

The foregoing are excerpts from THE NEW AQUARIAN AGE, by John S. Eason; 10 pgs., 8¼ x 11". Periscope Pub. Co. Toronto, Ontario, Canada; 57 Bloor St. W. 15¢ per copy.

* The BSR does not as a rule publish prophetic material, and never from a cultist or religionistic standpoint. Our Associates will determine their own acceptances. But some writing, such as the Eason lectures,contains valid factual material which in my opinion should be made available and familiar. Please do NOT order the Eason Lectures from BSR Hdqrs.*

We take this occasion to say that there is indubitable evidence, which to my regret cannot yet be publicised, that present global (planetary) conditions are regarded with deep concern and alarm by high authorities, in both governmental and scientific circles.

Also, we are informed by the M.P. Controls, that the earth is entering a region of dense space (dense ethers), with a disrupting effect on the ionosphere and on the internal stresses of the globe. The combination of factors may produce seismic disturbances of great magnitude - and in lesser degree these are already present. But the Natalli Control says: no major disaster likely in the US this year.

The Periscope Pub. Co. will mail new lectures as published, for $1.00 "until the payment is used up". The general approach is that of British Israel, or Anglo-Israel, plus "Pyramidology". See address above and note marked (*).

CANCER RESEARCH EXPOSÉ

(We quote below the opening portions of an article, running to twelve columns, printed in the May issue (Vol. II No.7) of EXPOSÉ, a monthly news sheet published at 55 West 42nd St., New York 36, N.Y. Single copies .25 -- 11 issues $2.00 -- 21 issues $3.00. While EXPOSÉ does not include the KOCH TREATMENT in its survey,we nevertheless recommend the article and hope that BSR Associates will read it and send a few copies to friends. The length of the article precludes our reproducing the whole of it).

. . ! More than 200,000 Americans are expected to die of cancer this year. Many of these people might be cured - as hundreds of others have been cured - by men who believe they have found ways to cure cancer.

These men, with varying theories and systems, have given new hope and eventual good health to hundreds who were told by "competent" medical authorities that their cases were hopeless.

Have the claims of these men been examined? Have their patients been examined? Has an evaluation been made of the claims? - No.

Have the achievements of these men been welcomed by the medical hierarchy? - Not at all. Rather, the men have been hounded and harrassed. Magazine editors have been threatened with dire reprisals if their stories are told.

Who has done the hounding and the threatening?

The foremost enemy of all men who can demonstrate practical progress against cancer is the American Medical Association.

Dr. G. H. Earp-Thomas has charged that "Cancer is the most profitable disease that members of the A.M.A. have." Of much help to the A.M.A. in its determination to resist progress against cancer are the American Cancer Society and the Damon Runyon Fund. Both organizations promote a planned campaign that is often deliberately deceptive. (Details will be described in this article.)

But the real vultures in the cancer business are the surgeons who call cancer a "surgical disease" (N.Y. Times, 12/4/52), and who pretend that surgery will "cure" cancer.

More than twenty years ago, a man considered then by many to be the American authority on cancer, L. Duncan Bulkley, was senior surgeon of the New York Skin and Cancer Hospital. Dr. Bulkley announced with a candor uncommon among surgeons that, "Cancer is not a surgical disease. Neither surgery nor x-ray nor radium have changed in any way whatever the ultimate mortality of cancer in forty years. It was 90% in 1884. Now it is 92%."

At that time , a Professor of Medicine at the University of Michigan wrote:"I can corroborate Dr. Bulkley's declaration, for in a practice of nearly forty-five years I have yet to see a single case of cancer, save a few semi-malignant epitheliomata, that has been cured by these measures, and my experience has been in European & American hospitals." -Twenty years later, how have things changed? - Testifying before a Senate Committee in 1946, Dr. Geo. Miley of Hahnemann Med. Coll. & Hosp., in Phila., quoted Dr. S. Reimann of Phila.as saying that he had made a survey of cancer cases in Penna. over a long period of time, and that he had found those who received no treatment lived longer than those who had received surgery, radium, or x-ray." .....

ADDENDA TO ROUND ROBIN IX-2

July-August 1953

We recommend to all Associates and RR readers that they give close attention to the broadcasts of Mr. Frank Edwards. This commentator has an open-minded approach to the problem of the Aeroforms, and to our own (BSR) interpretation of them.

It may be of material help in a fast developing world situation, if all of our readers will send Mr. Edwards a card or brief note to the effect that you have heard his broadcast and approve of his intelligent interest in the aeroforms - whether or not you agree with his forms of statement. Any informed and intelligent publicity is likely to be very important in the near future.

Address Frank Edwards, C/o Mutural Broadcasting Co., Washington - D.C.

ML

Typical of increasing interest: Mrs. Edna Robinson of Hughson, Calif. (Gen.Del.) writes:

....." all my personal friends are becoming interested in the flying Discs and are asking me for literature and books about them. Two years ago they all scoffed and poo-poohed the whole matter... and we have a group of doctors interested in the cancer treatments (Koch, Hoxsey) and they are watching closely a friend of mine who is almost cured after taking the Koch treatment. I also am in contact with a doctor in Oakland who will give the Lincoln treatment soon. ... The truth cannot always be kept hidden --"

NEW: THE ETHER OF SPACE. Mimeo. booklet, 27 pgs. A compilation by the BSRA Director and containing a statement of basic concepts as expressed by the Control, Ramon Natalli. Price $1.50

NEW: BIO-GENESIS: Extracts from the works of Dr. Charles W. Littlefield, M.D. Neatly bound. Important data. Compiled by BSR Assoc. Mark Gallert. $1.00

THE AURAMETER: Copies of the second printing of this 80-pg book are now available. Remarkable and important data in the field of radiesthesia. By Verne L. Cameron; edited by Meade Layne. $3.00

NEW: CLIPS, QUOTES, AND COMMENTS (CQC). Current miscellanea of material coming into BSR Hdqrs; items from correspondence and other sources. The Bi-monthly ROUND ROBIN will carry the longer articles and CQC will take care of the shorts, in part at least. Correspondents who do NOT wish to be quoted should make notation on their letters to that effect. Six issues of CQC for $2.50; 12 for $5.00. Every two weeks, on the 1st & 15th of each month. Mimeo, 8½ x 11" pgs.

Please do not order books from BSR Hdqrs. simply because we mention them in our publications - unless we say explicitly that we have them for sale. Order the Aurameter instrument from Verne L. Cameron, 1120 Grand Ave., Elsinore, Calif. The book entitled The Aurameter can be had either from Mr. VLC or from BSR Hdqrs. The cost of the instrument is $15.00; the book is $3.00

Last minute note: Professor Twining (math. and physicist) speaking thru Mark Probert concerning pyramid effects on razor blades etc., promises to study the matter but conjectures that the pyramid shape in some way delays or prevents "oxidation" - he regards dulling or wear of the cutting edge as equivalent to an oxidation. Experimenters should start with a new blade and keep fingers off the edge. Also try for the mummification of meat and vegetables - no decay. Let BSR have memo. of your results.

CONCERNING COMING EVENTS:

(San Diego,Calif.
July 1953.

The following statements were made in effect, by the Control, Yada di Shi'ite, on July 21, 1953; and we understand that the Control Ramond Natalli concurs. Mediumship of Mark Probert.

As most of our readers are aware, these communicators never give exact dates for coming events. for reasons well understood by most students of such matters. They say in effect: 'as things now look to us, we think it highly probable that such-and-such events will take place, or these conditions obtain, at about this time.' These tentative forecasts, however, have so far proven remarkably correct in their general aspects.

'THERE IS A STRONG POSSIBILITY OF HEAVY QUAKES, ESPECIALLY IN EUROPE, ALSO IN SOUTH AMERICA - AND IN VENEZUELA AND ALASKA. JAPAN IS LIKELY TO SUFFER FROM QUAKES MORE SEVERE THAN THOSE OF 1928.

'BAD HEAT WAVES WILL PROBABLY OCCUR BEFORE THE SUMMER IS OVER. THESE, AND THE QUAKES, WILL PROBABLY OCCUR DURING AUGUST AND SEPTEMBER, ESPECIALLY AT THE TIME OF THE COMING SOLAR ECLIPSE. THERE WILL BE SKY PHENOMENA OF A MOST UNUSUAL TYPE.

'IF DURING THE COMING LUNAR ECLIPSE (July 26) ASTRONOMERS WILL KEEP THE MOON UNDER STEADY OBSERVATION,the TAKE-OFF AND LANDINGS OF SPACE CRAFT MAY BE OBSERVABLE. THESE WILL APPEAR AS LIGHTS. THERE WILL PROBABLY BE MORE ACTIVITY ON THE PART OF THE SPACE CRAFT.

'THE SUN WILL BE TAKING IN MORE STELLAR DEBRIS AND THERE WILL BE AN INCREASE OF SUN-STORMS (sun spots).

'THE INSIDE OF THE EARTH IS GETTING HOTTER. THIS HEAT COMES FROM EXCESSIVE COSMIC RAY BOMBARDMENT - AND THIS IN TURN FROM DAMAGE TO THE IONOSPHERE, CONSISTING IN A KIND OF CRYSTALLIZATION OF THE UNDER LAYERS, (atomic bomb effects). *

'THE EARTH IS SHRINKING, i.e., THE INNER LAYERS ARE DOING SO, AND THIS WILL CAUSE THE OUTER LAYERS TO CAVE IN, PRODUCING VIOLENT QUAKES.

'VERY VIOLENT STORMS ARE TO BE EXPECTED THIS YEAR, AND THE COMING WINTER WILL BE THE WORST EVER KNOWN. '

* Note: The relation to atomic bomb effects was not specified at this time, but has been mentioned by the Controls on several previous occasions. (ML)

FLYING SAUCERS HAVE LANDED

by DESMOND LESLIE

and George Adamski.

At long last, after seven lean years of waiting - that is, of evasions, lies, stupidity, buffoonery, ridicule, abysmal ignorance of history and metaphysics, and Mumbo-Jumbo generally (born in our jungle) we have a real book dealing with the Aeroforms - or Discs or Saucers as you may prefer. It doesn't go the whole road even of our present knowledge, as we shall soon mention. But it is competent, honest, and often brilliant writing, by an author who knows that it is useless to dream and fumble and evade issues. Desmond Leslie has the necessary scholarship and metaphysical equipment and is not afraid to apply them. He has an immense amount of data and knows how to organize it. My guess is, he knows more about the basic facts than anybody else who has so far spoken above a whisper --

Those last three words are designed to let in some thousands of such 'whispering'on the part of the BSR publications and our many Associates.

Part One of this book contains a surprising resume' of historical data - distinctly not lifted from Charles Fort or other equally familiar sources. The author lays about with good-natured yet biting irony (and incidentally, puts what should be the last necessary blister on the buffoonery of one Harvard pundit named Menzel). The "Museum" section is a collection of sightings beginning with 1619 and coming down to 1929, where their number makes even a summary impracticable. And then Mr. Leslie goes back to the Vimanas, to written records in Sanskrit, and to Celtic and Atlantean prehistory. Almost word for word (as we have reported heretofore) the description of the powers and flight of the Vimanas (Kareetas) parallels that of the 'Saucers' of today. And the old stories of the fearful weapons of the Ancients (the hydrogen bomb equivalents) begain to take on reality. Something is happening to our perspective of history, to our basic ways of thinking, to our tag-ends of religionism and bargain counter culture - and the Visitation of the Discs is as a Sign and Source and Prophecy of a dim but hurrying Apocalypse.

Part Two of the book, the last fifty pages, is written by George Adamski - a compact and lucid account of his encounter with a Disc and Disc Man near Desert Center, California. If my reference to it here is brief it is not from under - rating its importance, but because we have several times published the substance of the account in mimeographed form. We have asserted from the first that the corroborative evidence is sufficient and indeed abundant. But it was not the first and certainly has not been the last of similar encounters, reported in detail by other persons.

About the only objections we raise to Mr. Leslie's achievement in this book, are on the score of things left unsaid. And they are left unsaid for obvious reasons - since even the most simplified data about the Visitation of the Space Dwellers (the Guardians) is still unbelieved by nine-tenths of our population. What will be the impact of this book? I think it is a first book, and that another and more in-going one may not be long delayed, in which our gifted Associate will speak his mind more fully. We are happy to have been of some service to him, and thank him for his lengthy acknowledgment (pgs 125-135). Certainly the book is a 'must' for all our Associates and a 'should' for everybody else.

M.L.

Flying Saucers Have Landed, by Desmond Leslie & George Adamski, 230 pgs.

October 30, 1953. PRICE $3.50. ORDER NOW.

THE BOOK OF GENESIS, AND SCIENCE

From A Brief Guide to the Teaching of Science in Secondary Schools, Bulletin No. 8, State Department of Education, Tallahassee, Florida. Reprinted by permission of the State Superintendent of Education, Dr. Colin English. The Bulletin was prepared by a Workshop at the University of Florida, June-July, 1947. Ed Henderson, Director; W. L. Goette, Hanor A. Webb, Consultants.

\- - -

Introduction: Many teachers asked the workshop group which prepared this bulletin to include suggestions, if any could be found, for helping the teacher advise with students and parents about the supposed conflict between the teachings of science and the teachings of the Bible. Many teachers have been misunderstood in their communities because of their inability to solve this problem. It is a real problem for many students and parents. The requests for help were urgent.

This section of the bulletin is presented in the hope that it contains helpful suggestions to teachers for approaching the problem. The material was compiled by a group of earnest science teachers, all of whom are sincerely religious in their outlooks on life and on the work they are doing. It is hoped that the suggestions will prove to be of value to the many teachers who must meet the situation. The workshop group made a special request of the State Department of Education that this material be included in the bulletin.

\- - -

At some time during each school year a science teacher will probably be questioned as to a possible conflict between interpretations of the text books of science and the Book of Genesis, in the Old Testament of The Bible. These questions are likely to be in earnest, and they deserve carefully considered answers.

Discussions between theologians and scientists have been continuous throughout the centuries. Among the most vigorously contended differences of opinion were the efforts to prove whether the earth or the sun is the center of our planetary system, and whether the earth is a plane or a sphere. Each of these, and many other controversies, were finally resolved by adjusting the beliefs of--both theologians and scientists to facts as they were discovered. This was made easier because of a sincere desire to know the truth on the part of most members of each group. After all, many theologians are interested in the marvels shown by science, and many scientists possess strong religious faith. Only the stubborn minds of each group are closed.

The most recent controversy has concerned the evolution of plants and animals upon earth, as contrasted with an instantaneous creation. Countless facts bearing on this matter are known, and the science of biology presents--even in high school--the most fundamental of them, in the lessons on comparative anatomy, plant and animal breeding, the genes of heredity, and many others.

If the science teacher discovers that his questioner is bent on starting a bitter argument, he must realize that the emotional feelings involved are stronger than the intellectual feelings. These feelings are based on inadequate information on both the teachings of Genesis and the science texts. Under such circumstances it is probably better to give the "soft answer," and avoid the "vain disputation." It is doubtful whether information or calm discussion would have any good effect.

To the sincere inquirer the teacher should offer a brief lesson as introduction, with further study suggested. The lesson should be

adjusted to the inquirer's comprehension, of course, with words and ideas no more complex than the elementary, intermediate, or high school-adult level.

What is the issue between certain interpretations of Genesis and the science texts? It chiefly concerns creation of the world, and the life upon it. To some people, creation is an instantaneous process, resulting in all the present forms of land and water, of plants, of animals, of man. To others creation is a gradual process of development according to fixed laws that still continue in the operation of the universe.

Each concept of creation may fully accept a Creator. In the first concept He is assumed to have worked with suddenness; in the second He established the laws by which all nature operates--and will continue to operate to the end of time. By the first concept creation is finished; by the second it continues.

The chief stumbling block to the person who lacks either theological, or scientific, scholarship is the literal--or "to the very letter"--interpretation of the English words into which the original Hebrew text of Genesis is translated. Bible scholars, for example, do not hold to the literal explanation of the world "created in seven days" (one week), because they know that the single Hebrew word for day, "yom," is translated by "no less than fifty-four different English words" throughout the Old Testament. (Quoted from Modern Science and the Genesis Record by Harry Rimmer, D. D.) To insist that the "seven days" contradicts the facts of the planet's great age, or "the four corners of the earth" disputes its form as a ball, is to put a word above a thought, and a name above an idea. Such an attitude shows no true spirit of interpretation and is not worthy of a scholar, or a seeker after truth.

The literal interpretation about creation that brings out the most earnest questions is of the 27th verse in Chapter I of Genesis: "So God created man in his own image." The "contradiction," then, comes in the statement (which, however, can not be found in any text of science): "Evolution teaches that man descended from a monkey." There is a climax in the clash of ideas concerning man's creation. If this be settled in the mind of an inquirer, the questions about plants and animals will seem of little consequence.

The science teacher should immediately broaden the discussion with an additional quotation from Genesis, verse 7, Chapter II: "And the Lord God formed man of the dust of the ground, and breathed into his nostrils the breath of life; and man became a living soul."

What is "the dust of the ground"? What is "the breath of life"? What is "a living soul"?

All living nature contains "the dust of the ground." Plants and animals alike are composed of the same mineral substances. It is a striking part of the Creator's plan that all life should thus be related, and none claim special chemical elements.

Man's body is no exception to this relationship to "dust." His ashes are essentially the same as those of the plants on which he feeds. Man's body, too, has the common organs of all the higher animals--the skeleton, heart, muscles, lungs, and others. There is a striking similarity in the arrangements of these organs in man and the higher apes. The composition of the blood is similar, even to the "blood types" and reactions to chemicals used for testing blood stains. Some monkeys' faces look unbecomingly like "people we know."

There is no use arguing against the obvious resemblances of the human body to the monkeys, other animals, and to plants in countless

respects. To the sincere interpreter this implies a common Creator of them all. There is no reason for man to be ashamed of his kinship with other objects of His handiwork.

The teachings of science, stated simply, are that a long development or evolution brought about the present varieties of plants and animals, instead of an instantaneous creation. Let's remember that we teach theories. This theory is consistent with the evidence of the great age of the rocks, and the ceaseless grinding of the sea upon the land for eons of time. After plants and animals were well established upon the earth, one of these creatures may have been selected by its Creator as possessing a body that might suitable house "a living soul." There was no need to create an entirely new form--neither plant nor animal, without skin or muscle, lacking heart and lungs--to carry this "soul." The decision was the Creator's! The highest body that His wisdom had formed was selected; this body is considered by science to have been a common ancestor of both the apes and men.

But a body is not a "living soul." It took a "breath"--better translated a "spirit"--to enter the body of a brute and cause a man to walk forth. Practically all scientists recognize the tremendous gap between the intelligence of the highest ape and that of the lowest man. It is true that numerous parts of skeletons of man-like apes or ape-like men have been found, which may be the so-called "missing links" in the course of human development. These raise questions that no scientist feels wholly competent to answer in full, and the study of these bones should be left to experts for such light as may ultimately be shed as to the nature of the creature whose skeleton included them. The honest theologian, even as the honest scientist, admits the existence of many problems in his realms of study for which infallible answers have not been revealed.

Now with the "breath of life" a body came to possess a "soul." It is true that a certain group of scientists and some theologians do not wish to consider a "soul" as too separate from the highly developed "mind" that man possesses. The distinction is not important to us in this discussion; man's mind is far above the minds of even the most intelligent animals. And who indeed but the Creator knows whether the "sparrow that falls" may not have a soul of sorts by which it worships God in its own fashion? Such an idea, of course, is neither a fact of theology nor of science.

With this "soul" man became a creature "in the image of God." This image is wholly a spiritual one. To assume that a resemblance in body (man and God) is implied is a literal interpretation of the lowest degree! A God with skin and hair--with bones and blood--even with lungs and heart and intestines--the concept is degrading! He who argues such simply has no appreciation of what is holy and high; his thinking is of the flesh and not of the spirit. "God is a Spirit; and they who worship Him must worship him in spirit and in truth." (John 4:24.)

There is nothing really inconsistent in the liberal (not literal) interpretation of Genesis, and the proved facts of science, with the idea that man is both a physical and a spiritual being. If his body, like the bodies of other animals, has developed through eons of time according to the workings of natural law,
